Date: July 19, 2013

Subject: Pavilion Use Dates 2008 - July 18, 2013 - Proposed Dates through December 2013

The event schedules are prepared by Scott's catering department under the management of *Vickie Eiges, Director of Catering and Sales - Scott's Seafood, Jack London Square -vickie@scottsjls.com*.

Scott's uses a calendar/scheduling program used by the industry known by the title -"Reserve". The program can generate reports including some of the information presented within the attached use and reservation reports. For internal controls, the catering staff, who has handled the reservation associate their initials with the event and the report automatically generates that information. The letters after the initials indicate D- Definite, I for inquiry, and T for tentative. These letters only affect the future events and are necessary for the staff to keep track of the system, based on the fact that there are several people working in the same office and to avoid double bookings, etc. The computer reservation system "Reserve" is a program that Scott's has used for a number of years and the data is kept on the computer network in the Scott's Catering office and can be reviewed or accessed by any one of the reservation or management staff for audit purposes.

It is also necessary, from the Catering staff overview standpoint, to indicate when the Pavilion is reserved for "Public Use" so that they don't book an event that would be in conflict with a planned public event for Jack London Square. These dates are also automatically generated from the "Reserve" program and included in one of the automatically generated queries. For the purposes of reporting to BCDC and the Port the Public Use programs are not counted as a "Private Use" and are not totaled in the use number or hours, submitted for past or future (proposed) events.

The reports are tabulated by quarter beginning with the first quarter of 2008
